2-Hour Class: Chiropractic Coding and Billing Fundamentals

Join us for an engaging and high-energy 2-hour class that dives into the essential aspects of chiropractic coding and billing. Co-taught by the dynamic duo of Dr. Chris Anderson and Dr. Evan Gwilliam, this session will equip chiropractic team members with a solid foundation in coding and billing guidelines. Through interactive discussions and real-world scenarios, participants will gain a deep understanding of coding principles, billing practices, and strategies for preventing common coding pitfalls.

Dr. Chris Anderson, making his return to teaching in Wisconsin, a second-generation WISCONSIN chiropractor and a Certified Insurance Consultant, along with Dr. Evan Gwilliam, Clinical Director for PayDC Chiropractic Software and a Certified Professional Coder, brings a wealth of experience and expertise to this session. Their combined knowledge spans healthcare compliance, chiropractic practice, coding, billing, and business management, ensuring participants receive a well-rounded and practical education, with making a boring subject come to life, with their high energy and expertise.

Learning Objectives:

By the end of this 2-hour class, participants will be able to:

- **Navigate Coding and Billing Guidelines:** Understand the fundamental guidelines for accurate coding and billing in chiropractic care, ensuring compliance and optimizing reimbursements.
- **Distinguish Standard of Care:** Differentiate between standard of care and various treatment modalities, ensuring that coding accurately reflects the level of care provided.
- **Differentiate Active vs. Maintenance Care:** Clearly distinguish between active treatment and maintenance care in coding and billing, reducing the risk of inaccuracies and denials.
- **Utilize Good Faith Estimate:** Learn to provide patients with accurate good faith estimates for their chiropractic services, fostering transparency and trust.
- **Understand Informed Consent:** Grasp the significance of obtaining informed consent from patients for proposed treatments and related financial obligations.
- **Decode Modifier Usage:** Understand the purpose and proper usage of modifiers in chiropractic coding to accurately reflect complex scenarios.
- **Distinguish New vs. Existing Patients:** Clearly differentiate between coding and billing procedures for new and existing patients to prevent errors and denials.

Hour one

- **Navigate Coding and Billing Guidelines**
- **Review Distinguish Standard of Care with the use of modalities**

- Active vs. Maintenance Care

Hour two

- Good faith estimate
- Informed Consent Review
- Modifier Review
- New vs Existing patient requirement review
